

REVIEWING THE BANK PRESENTATION.

Natnael Getachew

Sun Trust.

On this presentation they come and thought us a lots of thing like savings and credit.

Wells Fargo

On this presentation Mr. Elton explained how everything works and told us to ask him questions so that we can understand everything.

comparing

- The Sun trust bank helped me to understand about credit card and saving account and how to manage money
- The wells Fargo helped me to understand more about how to manage and why banks are important.

More interesting

- The wells Fargo was more interesting because first we were in the actual bank and also we get to be divided in to 2 groups so that we can ask questions freely and also Mr. Elton got to answer all of our questions.
- The wells Fargo presentation was more detailed and easy to understand. He also thought us about how the bank works. The interest rate and that there is no a service fee for teens.

What I learned

- I have learned that I have to have a credit card no matter what and I have to keep my credit history good. if I don't have a credit card everything will be hard and a bad credit score and a no credit are counted as the same. If have a good credit score I will pay less interest and if I have bad credit score I will pay more interest. The thing that surprised me the most is that getting a credit card is a hard thing. I will use a credit card and keep my credit score as high as possible.
